Firms decrease production

AVERTIR
EXPERIENCE
AVANCE

Produced 19,000
sold 19,000

Firms could not
sell everything
they produced:
Inventories **rise**

Produced 25,000
sold less 24,000

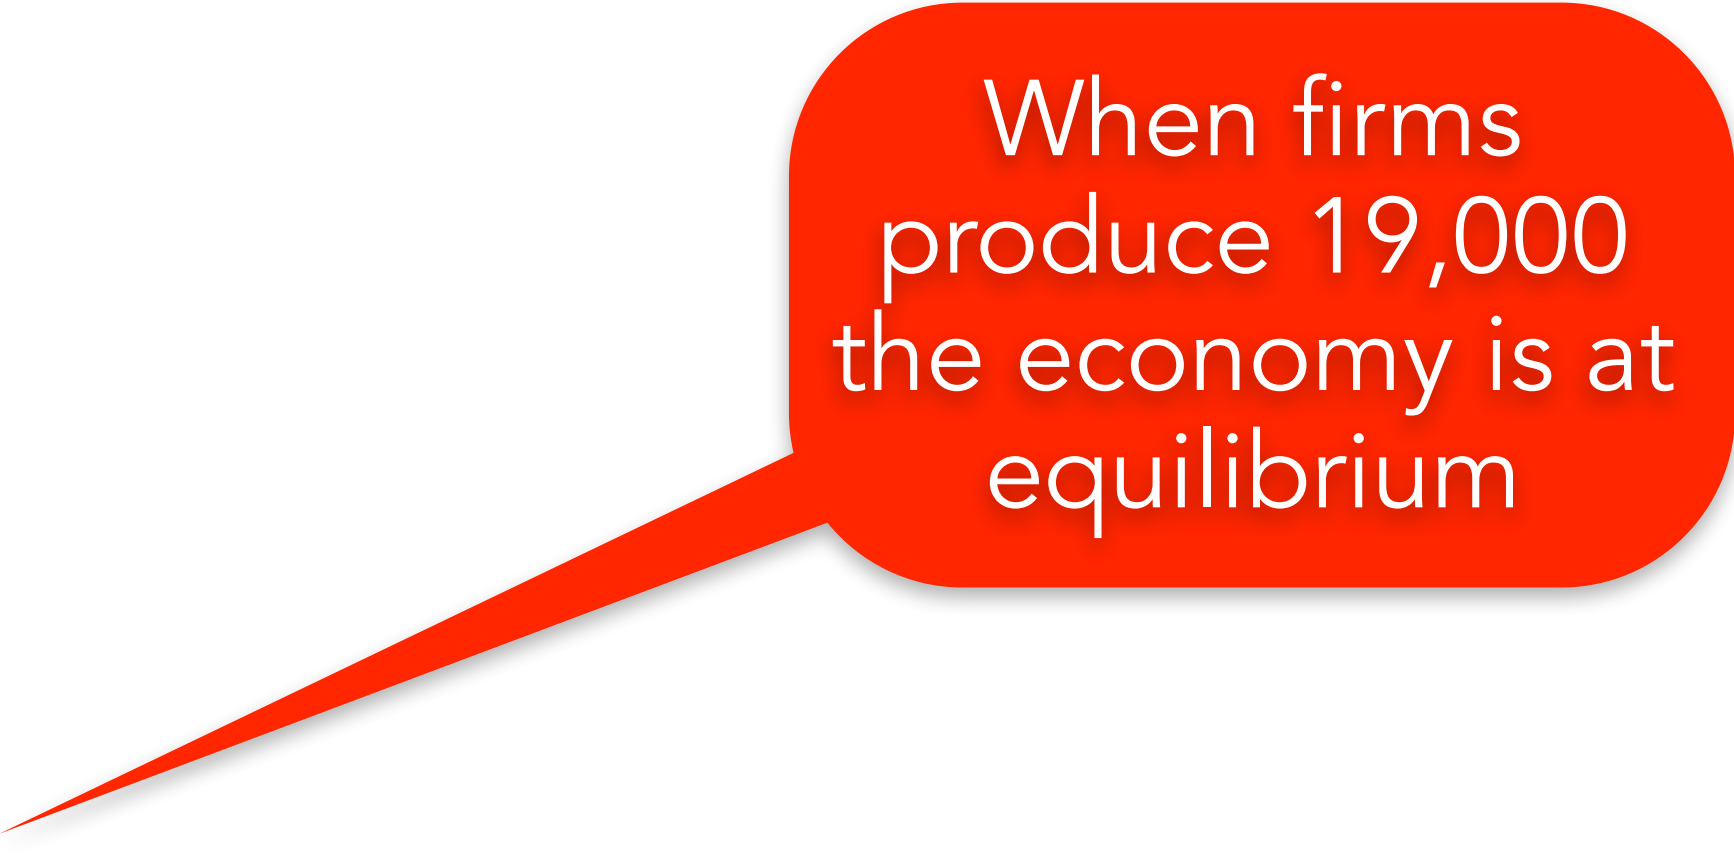

Produced 5,000
sold **more**: 6,400

No change in
inventories

Firms sold part of what
they had in inventories:
inventories **drop**

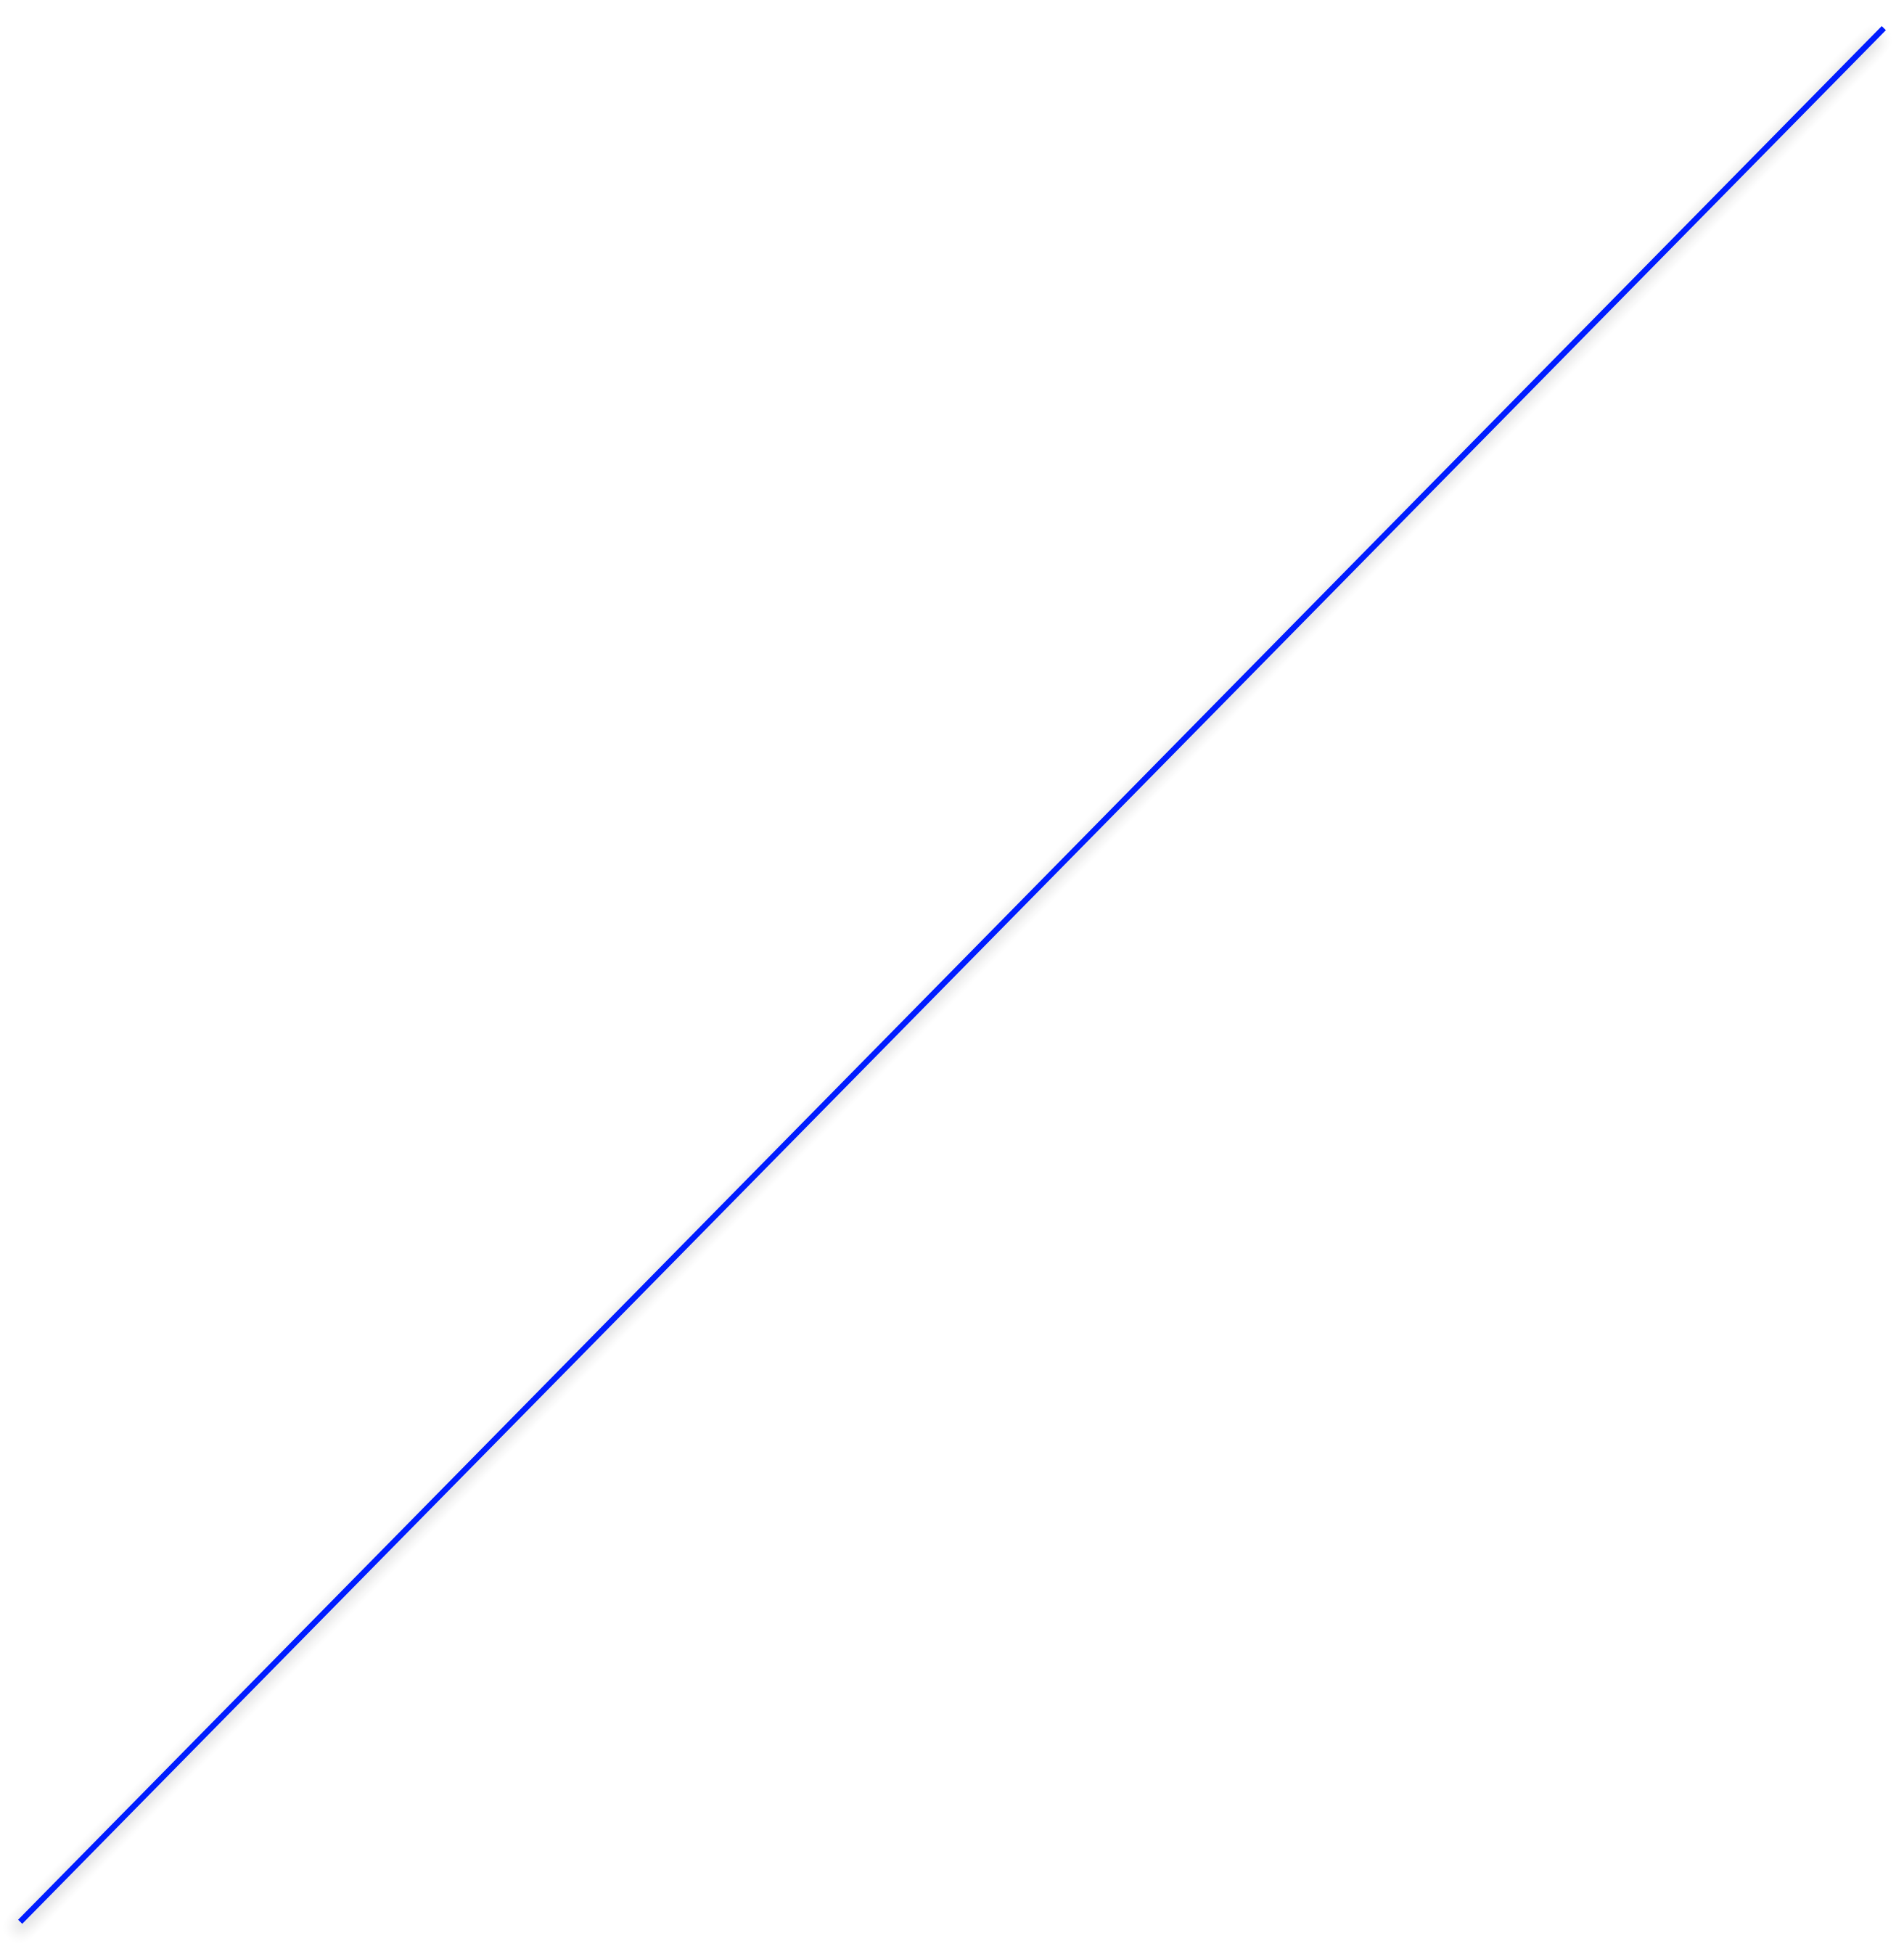

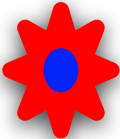

When firms
produce 19,000
the economy is at
equilibrium

Produced 10,000
sold **more**: 10,900

Firms sold part of what
they had in inventories:
inventories **drop**

Firms increase production

Firms do not change production
